

Jose Heamir A

Full Stack Software Engineer | Java · Spring Boot · React.js · REST APIs · MySQL · MongoDB
joseheamir.a@gmail.com | +91 8838806412 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with 3.2+ years of experience building scalable SaaS applications using Core Java, Advanced Java, Spring Boot, Microservices, React.js, REST APIs, MySQL, and MongoDB. Experienced in backend development, REST API development, OAuth 2.0 security integrations, and cloud deployments on AWS. Strong understanding of Hibernate/JPA, Git version control, CI/CD pipelines, Agile/Scrum methodology, debugging, and problem-solving. Immediate joiner with hands-on experience in scalable enterprise application development.

TECHNICAL SKILLS

Backend / Core	Core Java, Advanced Java, Spring Boot, Microservices, REST API Development, Multithreading, Exception Handling, Hibernate, JPA
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3
APIs & Architecture	REST APIs, OAuth 2.0, API Security, Microservices, SaaS Architecture
ORM / Databases	Hibernate / JPA, MySQL, MongoDB
Cloud & DevOps	AWS EC2, Docker, Nginx, Git, Maven, Kubernetes (Basic Knowledge)
Architecture & Tools	OAuth 2.0, API Security, Event-Driven Architecture, Kafka (Basic Knowledge), Agile/Scrum, Version Control

PROFESSIONAL EXPERIENCE

Software Engineer – Lead Developer | Spot Future Technology India Services Jan 2023 – Feb 2026

Product: Dijo HR – HRMS SaaS Platform | Bangalore, India

- Designed and developed scalable RESTful APIs using Java, Spring Boot, Hibernate/JPA, and Microservices architecture.
- Developed backend modules for payroll, attendance, and employee lifecycle management systems.
- Implemented OAuth 2.0 authentication and authorization integrations with government systems.
- Worked extensively with MySQL and optimized database queries for high-performance data retrieval.
- Collaborated with cross-functional Agile teams and participated in sprint planning and feature delivery.
- Used Git for version control and Maven for build management.
- Deployed applications on AWS EC2 using Docker and Nginx.
- Implemented logging, exception handling, debugging, and retry mechanisms for production stability.
- Built React.js-based dashboards integrating REST APIs for real-time analytics visualization.

Client Project: Intruceptlabs Pvt Ltd – Cyber Analytics Platform

- Built interactive data visualization dashboards using React.js, integrating async REST APIs and delivering real-time analytics UI for stakeholders.
- Collaborated directly with stakeholders to turn business needs into technical solutions.

Frontend Developer Intern | Vertex Spatial Solutions

6 Months

- Developed UI components in Vue.js and built responsive web layouts using HTML, CSS, and JavaScript — broadening frontend tooling experience.

KEY PROJECT

E-Learning Portal System | Full Stack Personal Project

Tech Stack: Java, Spring Boot, React.js, MySQL, AWS EC2, Docker, Nginx

- Built a full-stack microservices application with authentication, course management, and progress tracking modules.
- Developed and documented REST APIs using Spring Boot; deployed on AWS EC2 with Nginx as reverse proxy.
- Used JPA/Hibernate for database operations and designed for horizontal scalability.

EDUCATION

MCA – Master of Computer Applications

2020 – 2022 | 81.21%

Gandhigram Rural Institute (Deemed University), Dindigul, Tamil Nadu

B.Sc., Mathematics

2017 – 2020 | 78.86%

G.T.N Arts College, Dindigul, Tamil Nadu

KEY ACHIEVEMENTS & DIFFERENTIATORS

- Successfully implemented production-grade OAuth 2.0 integration with a government platform (IRAS AIS), demonstrating mastery of API security.
- Recognised for technical ownership and leadership: delivered scalable SaaS features end-to-end, from architecture to deployment, with zero downtime.
- Multi-language OOP proficiency: Java (primary), Python, Node.js
